Bio-Diversity Policy

Biodiversity means the total variety of all living things. Biodiversity is the natural capital which supports all our lives and is a key measure of the health of the planet.

All areas of the Swish's operation will have some impact on biodiversity; the way in which the company carries out such functions as purchasing, production, site management and transportation, all have an effect.

Policy

It is the policy of Swish Building Products to:

- Make an annual assessment of the impacts that its operations have on biodiversity.
- Include a consideration of the impacts on biodiversity in investment decisions.
- Aim to implement a purchasing policy that favours products and services and suppliers that have the least impact on biodiversity.

In addition Swish will seek to:

- Encourage similar standards and principles towards biodiversity conservation from all third parties involved with the business.
- Engage with the local community and other stakeholders as far as is possible in connection with biodiversity conservation.
